

MOORE ON HOW TO READ TAROT

💎 When reading Tarot or Oracle cards there are always at least 3 messages, symbols, or signs.

A. Imagery - Colors, people, places, structures, animals, glyphs, elements, astrology, or any other images that resonate from your personal life.

B. Intuition - Internal guidance and feelings based on the card. You will always feel some type of energy when you touch, look at, or think of the card. Always follow that. Do not reject the energy regardless of how intense, uncomfortable, and or eerie. At times it will overwhelm you and move you to emotional expression. Breathe! Deep breaths will decrease this heaviness and allow you to clearly process the energy. This is also what you always know. A very deep emotional knowing and awareness of a specific feeling. Consider all the experiences that resonate based on that energy. This will help you clarify what the message and guidance truly is.

C. Insights - Internal vision. This one is hard to explain. You can absolutely look at the definition but as it relates to tarot this is all those internal pictures, places, dreams, songs, people, mantras, day dreams, traumas, experiences, wisdom, insecurities, and triggers which surface as you are reading. What made you think of that? How does it relate to the cards? Follow them with courage and confidence. Breathe and write down these insights to help you develop a stronger connection to the card and what resonates for you when you pull it.
